Emergency Preparedness Checklist

Are there smoke detectors in each bedroom and in a common living area?

YES NO

Are the smoke detectors powered by the main electrical supply with a battery backup?

YES NO

Are all counter electrical outlets protected by a clearly visible circuit breaker?

YES NO

Has the contractor installed fireblocking where needed in the stud runs and at the top and bottom of all stairways?

YES NO

Have the spaces around wires and pipes been firestopped and treated against the passage of toxic fumes with an approved firestopping filler, (not foam, fiberglass or rockwool).

YES NO

Is the home certified as being FireSafe?

YES NO

Has all framing been done with common nails as opposed to sinkers?

YES NO

Have hurricane straps been installed between the roof trusses and framing?

YES NO

Is there a first floor bedroom and bath to accommodate you following surgery?

YES NO

Is outside air provided to the fireplace, gas hot water heater or other fuel burning fixture?

YES NO

Is there a carbon monoxide detector located near the bedroom area?

YES NO

Do all chimneys have good clearance above the roof line?

YES NO

In areas where radon gas might exist, has the home been built with radon mitigation venting already installed?

YES NO

Will a ramp for handicap access be easily installed on the property if it is ever needed?

YES NO

In urban areas where window bars are used, will they be an impediment to escape in the event of a fire?

YES NO

Are areas around swimming pools clearly inaccessible to young children? Do all doors and/or gates to swimming pool areas close and latch automatically? Are all the latching devices at least 48" high?

YES NO

Can deadbolt locks be unlocked from the inside without a key? Can a child work the lock and get out in the event of fire?

YES NO

Have steps been taken to seal an attached garage from the living area? The garage should be sealed against the passage of fire or toxic gases including carbon monoxide.

YES NO
